

THE ONLINE SCIENTIFIC WRITING WORKSHOP

THE Online Scientific Writing Workshop teaches the skills to produce research papers of the highest quality for the world's top journals. The workshop takes place over 4 half-days.

Participants will learn the writing techniques necessary to best construct and explain their ideas and the editing skills to refine and polish their work.

A key focus is the structure of good scientific communication. We look at this at the level of sentences, paragraphs, abstracts and entire papers, using examples from a wide range of disciplines.

The course also offers tips on grant proposal writing as well as on dealing with editors at journals.

We believe that people learn by doing, so each session includes thought-provoking exercises to help participants practice the techniques we teach.

A unique and popular part of our workshop is the one-to-one feedback we provide for each participant about their own work. This helps you apply the techniques we teach to your own writing. These sessions are also an opportunity to discuss any other questions or seek specific advice.

Day I

08:00 Introduction
08:30 Diary of a paper
09:15 Science and the media
09:45 Break
10:00 Sentences I
11:30 Tractors
12:00 End of first day

Day II

08:00 Titles and abstracts
09:15 Break
09:30 Grant proposals
10:00 Paragraphs
12:00 End of second day

Day III

08:00 Sentences II
09:15 The process of writing
09:30 Break
10:45 Graphs and figures
10:15 References and covering letters
11:00 Group editing
12:00 End of third day

Day IV

08:00 Types of scientific papers
08:30 One-to-one consultations in parallel with writing exercise
09:30 Break
10:00 Consultations and writing exercise continued
11:30 Feedback, questions and concluding remarks
12:00 Workshop ends
